- 1 DO NOT set anything on top or around Air Tracks during inflation

- 2 Open the valve cap. Push the button and turn it to the anti clock wise.

- Type A : for Foot pump and 600W Electric pump
- Type B : for 1000W / 2000W Electric pump

- 3 Insert the pump. If using an automatic pump, turn it on. Screw the latch back on.

Quick guide for Repairing a leak and Warning

Repairing Procedure

- 1 Seek Out the Puncture Site
The air bed can be inflated or deflated to apply the patch, depending on what is easier for the user.
- 2 Cut the patches to right size to fit the damaged area.
- 3 Clean the area where the repair is necessary
- 4 Glue the patches
- 5 Put the patch to the area and hold it in place until the adhesive is dry. If the user repairs the mattress in the deflated state, inflate it to ensure the patch works to seal the puncture.

Warning

To reduce the risk of injury, please read and follow all instructions before using this product.

- Deflate and roller it when not in use for a long time.
(Do not get it stored with folded.)
- Make sure the area should be flat, no sharp objects that could cause Air Track a lot of problems.
- Do not set up Air Track near stairs, doors, sharp edges or breakable objects. Provide adequate space between Air Track and objects to avoid product damage.
- Do not operate air pump for more than 10 minutes at a time. Let pump cool at least 10 minutes between uses.
- Close supervision is necessary when this is used by the children.

Follow these rules and all instructions to avoid injury, product damage, and all other accidents.
