Step 1:

Locate the **Bottom** of the strap (I) and insert it through the hole on the Floating Plank.

Step 2:

Thread the **Top** loop of the strap (A) completely through the Bottom loop. When tightened, this should form a knot at the base of the Floating Plank.

Step 3:

Hang the strap's end over your cross pipe and use a **Quick Link** to join the loops together.

For 10 ft rigs, we recommend using Loops E and F.

Step 4:

Repeat Steps 1-3 for each additional strap.

IMPORTANT:

For each additional strap, be sure to use the same loops on each side to keep the swing level.
