

Flying Squirrel

Parts Included:

- 2 - Wooden Arm Assemblies
- 4 - 1.25" Locking Collars
- 4 - 1" Locking Collars
- 2 - 10" Steel Handle

Tools/Additional Materials Needed:

- 1.25" Steel Cross Pipe
- 5/16" Hex Key

Instructions:

Step 1:

Slide 1.25" locking collar onto cross pipe, followed by wooden arm (larger end) and then second 1.25" locking collar. Repeat for second arm.

Step 2:

Slide steel handle through smaller end of wooden arm and then slide one locking collar on to each side. Align the handle and then slide the locking collars against the wooden arm and tighten set screws to 29 lb.ft. If a non-rotating handle is desired, tighten set 3/8" screw in center of arm until steel handle is secured.

Step 3:

Slide arm assemblies into desired position on cross pipe, slide locking collars against wooden arms and tighten set screws to 29 lb. ft.
